Percentage: 91.8%

PROJECTS

Real-World Problem-Solving Project

FocusLearn - (Personalized Learning Platform)

[React, TailwindCss, ExpressJs, MySql2, JWT]

Problem Statement: Learners using YouTube for skill development often get distracted by recommendations, lack progress tracking, and struggle with note retention.

Solution: Developed a platform that allows users to create personalized learning journeys and avoid distractions for a focused and structured learning.

Key Features:

- Custom journey creation with individual YouTube videos or automatic generation from playlist URLs.
- Rich text editor for notes with download option.
- Real-time progress tracking and public journey forking.

Social Media Website

[MERN Stack, Tailwind CSS, JWT]

Developed a responsive social media platform using React.js, Tailwind CSS, Node.js, Express.js, and MongoDB.

Key Features:

- Users can create posts, like, comment, share, and post stories in real-time.
- Secure JWT login with a responsive UI built using React and Tailwind CSS.

SKILLS

Languages: C++, Python

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap 5, Tailwind CSS

Backend: Node.js, Express.js

Database: MySQL, MongoDB

Tools: Git, GitHub, Postman, Locust, Hurl, Apache Benchmark (ab)

Other: JWT Auth, REST APIs

ACHIEVEMENTS

- Secured top position in 12th grade with distinction.
